

6 Benefits of Safefood 360° for the Chief Financial Officer

1 ELIMINATE CAPITAL EXPENDITURE IN SOFTWARE DEPLOYMENT

Safefood 360° is a cutting edge cloud hosted food safety management software platform for food businesses. It requires zero purchase or installation of servers, databases or new hardware and software. It is entirely hosted, maintained and supported by the Safefood 360° team which eliminates any requirement for upfront capital expenditure. Furthermore there is no requirement on your internal IT department to support and manage the platform.

2 PREDICTABLE SUBSCRIPTION BILLING

Safefood 360° is licensed for a predictable annual subscription fee with no hidden extras or nasty surprises. This fee grants access to the entire platform and includes unlimited user accounts, hosting, backup and security. It also includes continuous updates and improvements to the platform in line with customer feedback and evolving food safety regulations and compliance. World class 24/7 technical support is provided to all customers at no extra cost.

3 REDUCE COST AND INCREASE EFFICIENCIES

Safefood 360° provides a single standardized and harmonious GFSI aligned food safety management platform across your entire group. Substantial efficiencies and greater productivities can be achieved by ensuring everyone is working off the same page. The need to employ costly food safety consultants is greatly reduced with customers on average achieving a 50% reduction in consultancy costs in their first year.

4 NEGOTIATE BETTER PRODUCT RECALL INSURANCE PREMIUMS

Safefood 360° is a world class food safety management software platform which meets and exceeds regulatory requirements for food safety. An efficient food safety management system greatly reduces the possibility of tainted product reaching the market resulting in a costly recall or withdrawal. Your recall insurance provider should recognize this, empowering you to negotiate a reduced annual premium.

5 ALIGNED WITH YOUR SUSTAINABILITY BUSINESS INITIATIVE

Safefood 360° can dramatically reduce and in many cases entirely eliminate food safety paper records from your operation. The software runs in the Microsoft Azure cloud, which is one of the greenest technology platforms in the world. The demand for corporate travel to conduct site inspections and supplier audits is reduced substantially. These benefits promote sustainability and help protect the future of our planet while reducing your costs.

6 TURN YOUR OUSTANDING FOOD SAFETY REPUTATION INTO MORE SALES

Safefood 360° will not only greatly impress your auditors but will build confidence with your customers too. By adopting our platform you can maintain a substantial competitive advantage over the competition which is still operating manual, error prone, paper-based systems. No other solution can offer the level of detail and compliance required to meet today's evolving food safety obligations. We can help your business grow.

+ MORE

Our global community of users can speak for the tremendous benefits that come from choosing Safefood 360° to support your food safety management system.

"I work with many 3rd party vendors and Safefood 360° by far provides the best customer service in terms of response time and time to resolution. Safefood 360° was also the easiest system implementation I have ever done."
