

6 Benefits of Safefood 360° for the VP of Technical / Quality

1 ONE SEAMLESS SYSTEM FOR YOUR ENTIRE ORGANIZATION

With a cloud based solution you can drive substantial efficiencies through standardizing systems across your entire organization. With Safefood 360° you can select any global scheme, such as the SQF, BRC & FSSC 22000, and implement this as standard for any number of sites in your group.

2 ELIMINATE PAPER AND SEE THE WOOD FROM THE TREES

You can transfer all your existing management, PRP, HACCP, testing and monitoring records over to our digital platform. The system automatically generates new records as required for completion from any location inside or outside the plant. All your records, reports and documents are securely stored and accessible and in perfect order without the chaos paper based systems bring.

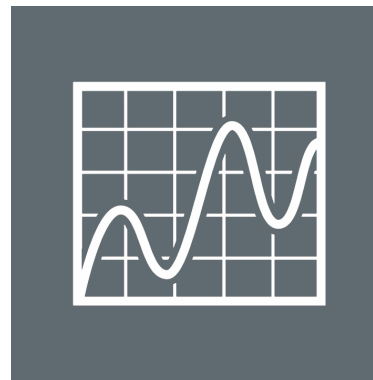

3 TRAVEL ONLY WHEN YOU ABSOLUTELY HAVE TO

Most VPs of Technical / Quality spend too much time travelling to local sites and visiting suppliers. This can be exhausting, hugely time wasting and costly. Safefood 360° can dramatically reduce the need to travel as you have all the information you need at your fingertips. Work can be completed in real-time from the comfort of your own office. When you do find the need to travel be sure to take your iPad with you so that you can complete much of your work prior to arrival.

4 REAL TIME OVERSIGHT CAN DRIVE CHANGE IN CULTURE

Safefood 360° gives you the oversight you need to drive positive change amongst your team. Automatic notifications of real-time events, corporate and local dashboards, scheduled reports arriving to your inbox, will all lead to an improved food safety culture within your organization.

5 SPEND YOUR PRECIOUS TIME ON VALUE ADDING ACTIVITIES

Safefood 360° is designed to ensure that you and your team members spend the least amount of time possible collating paper documents, programming spreadsheets, chasing records and ticking check sheets. The platform takes the pain out of managing a food safety system and alleviates your team from carrying out mundane, repetitive tasks. More time can be spent completing value adding activities such as new product development and continuous improvement.

6 ALWAYS BE PREPARED FOR THAT SURPRISE AUDIT

With the global shift towards unannounced audits it is now more important than ever that each local site maintains a constant state of audit readiness. This can only be achieved through leveraging automated food safety management systems like Safefood 360°. Rest assured that Safefood 360° will work around the clock for you, ensuring no tasks or programs are overlooked. It will even keep itself up to date in line with evolving regulatory and GFSI requirements.

+ MORE

Our global community of users can speak for the tremendous benefits that come from choosing Safefood 360° to support your food safety management system.

“Safefood 360° is designed by food safety professionals for food safety professionals. The software is invaluable for our group quality assurance and food safety program. The support team has been extremely responsive to our needs and they practice continuous improvement every day.”
