

What is Cloud Software?

Cloud software—sometimes also referred to as SaaS, software as a service—means that we host, update and maintain the software on your behalf for a yearly subscription fee. All you have to do is to log into to the application with your internet browser and you'll have access to the most recent version of the software with all your data. We also take care of security and backups.

Top 5 Benefits of Cloud Software

1 Everyone is working with the same data in real time

2 Continuous backups and robust security keeps your critical data safe

3 Software is updated automatically in line with evolving requirements

4 No need for specialist hardware as you'll have great performance on all devices, old and new

5 Access your data from anywhere in the world, any time of the day
